

DriveSRMTM is available in the SaaS (Software as a Service) model, accessible via the internet in a secure environment that provides:

- A centralized registry of suppliers and third-party vendors
- Control of due dates and document management
- Visibility and evaluation of supplier performance
- Analysis of documents
- Private access for users and suppliers
- Checklists standardized according to categories
- Automatic notifications
- Management and operational reports
- A centralized document repository with tracking and document history
- Cloud portal and SaaS accessibility
- RFI and RFP processes

AgileOne is a global, award-winning workforce management company with experience managing suppliers and subcontracted third-party vendors through **DriveSRM**, a software as a service (SaaS), proprietary technology that takes a comprehensive approach to supplier data management. **DriveSRM** gives companies unprecedented visibility into their suppliers with a single location to store, utilize, and report supplier-related data. **DriveSRM** provides a secure repository to store important documents, engage suppliers, follow and track documents related to the engagement process, manage third-party employee documents, and create comprehensive reports.

Organizations use **DriveSRM** to:

- Register/Engage Suppliers
- Manage Supplier Contracts and Certifications
- Manage Third-Party Employees Documents
- Rating Suppliers Performance
- Run RFIs and RFPs

From on-boarding suppliers to tracking performance, **DriveSRM** collects and leverages your supplier-related data so you can keep these critical relationships on track. With **DriveSRM** your organization is able to create standards to monitor documents, track documents that have not been provided, and identify documents that do not comply with established standards. Scores are assigned to each document, improving the quality of communication between suppliers and the organization, and guaranteeing compliance with all requirements, including ancillary obligations and issues related to social security obligations and financial information.

SURVEYS

AgileOne provides a complete solution for engaging suppliers and third-party document management including the ability to engage experts to analyze supplier documentation and help clients gain visibility into their workforce.
